12 -12- 2015 CAN BE NOT ONLY HISTORIC DAY BUT A GREAT DAY FOR HUMANITY

SAYS PRESIDENT HOLLANDE

Paris, Washington DC, 18.12.2015, 03:24 Time

USPA NEWS - "The December 12, 2015 can be not only a historic day but a great day for humanity. It can be a message of life and I will be personally happy, almost relieved, I will be very proud that that message be launched in Paris, because Paris was wounded there just a month, day for day" President Hollande.

The December 12, 2015 can be not only a historic day but a great day for humanity. The December 12, 2015 can be a message of life and I will be personally happy, almost relieved, I will be very proud that that message be launched in Paris, because Paris was wounded there just a month, day for day, stated President Hollande at COP21 closing.-----

"So ladies and gentlemen, France asks, France implore you to take the first universal agreement on the climate of our history. It is rare to have in a lifetime opportunity to change the world, you have this occasion, to change the world. Seize it for the planet to live, long live to humanity and long live the life." President Hollande Said.-----

PARIS AGREEMENT CAPTURES ESSENTIAL ELEMENTS TO DRIVE ACTION FORWARD-----

The Paris Agreement and the outcomes of the UN climate conference (COP21) cover all the crucial areas identified as essential for a landmark conclusion:

“¢ Mitigation ““ reducing emissions fast enough to achieve the temperature goal

“¢ A transparency system and global stock-take ““ accounting for climate action

“¢ Adaptation ““ strengthening ability of countries to deal with climate impacts

“¢ Loss and damage ““ strengthening ability to recover from climate impacts

“¢ Support ““ including finance, for nations to build clean, resilient futures

As well as setting a long-term direction, countries will peak their emissions as soon as possible and continue to submit national climate action plans that detail their future objectives to address climate change.

This builds on the momentum of the unprecedented effort which has so far seen 188 countries contribute climate action plans to the new agreement, which will dramatically slow the pace of global greenhouse gas emissions.

The new agreement also establishes the principle that future national plans will be no less ambitious than existing ones, which means these 188 climate action plans provide a firm floor and foundation for higher ambition.

Countries will submit updated climate plans ““ called nationally determined contributions (NDCs) ““ every five years, thereby steadily increasing their ambition in the long-term.-----

Climate action will also be taken forward in the period before 2020. Countries will continue to engage in a process on mitigation opportunities and will put added focus on adaptation opportunities. Additionally, they will work to define a clear roadmap on ratcheting up climate finance to USD 100 billion by 2020-----

This is further underlined by the agreement’s robust transparency and accounting system, which will provide clarity on countries’ implementation efforts, with flexibility for countries’ differing capabilities. Source UNFCCC
